## Information Brochure

ADMISSION TO THE B.TECH(CSE) & B.TECH(ECE)  
PROGRAMS

# 2013

## background

Indraprastha Institute of Information Technology, Delhi (IIIT Delhi) was created as a State University by an act of Delhi Government (The IIIT Delhi Act, 2007) empowering it to do research and development and grant degrees.

The institute began with its first batch of 50 B.Tech. Students in 2008. Since then, it has come a long way with 33 faculty members specializing in diverse areas of Computer Science (CSE) and Electronics & Communication Engineering (ECE), and about 600 students consisting of 4 batches of B. Tech., 2 batches of M. Tech. and 4 batches of Ph.D. students. In a relatively short time, it has earned a good reputation in India and abroad for being a centre of quality education and research in IT. The institute is approved by UGC and AICTE.

## location+infrastructure

IIIT Delhi has been operating from its permanent campus in Okhla, Phase III, since August 2012. On the permanent campus, besides sufficient facilities for teaching and research, adequate provisions have been made for dining, sports & hostels for both boys and girls. More information about the campus is available on the institute's website [www.iiitd.ac.in](http://www.iiitd.ac.in).

## about the programs

Information Technology is a broad area which uses Computing and Communication technologies to solve problems. The two major disciplines to nurture these are Computer Science and Engineering (CSE) – which covers computing science and its applications, and Electronics & Communication Engineering (ECE) – which covers science and engineering of communication technologies and computing systems. The institute has B.Tech programs in both of these areas, namely B.Tech (CSE) and B.Tech (ECE).

The first year of the program is common for both B.Tech(CSE) & B.Tech(ECE) – this provides a strong foundation and ability to students to allow them to move from one program to the other next year. After the first year common program, the second year course is relatively fixed, comprising mostly core courses for the discipline, while third year onwards the program is flexible having mostly electives, which may be organized as streams in areas to provide limited specialization. Electives and streams allow students to choose courses and subjects in accordance with their interests. More information about the programs and courses in them is available on the website.

## placements

The second batch of B.Tech students is graduating in 2013. Average yearly compensation for graduating BTech students has been over Rs 7.5 Lac in both the years - further details are given on the website.
